Dear future ClickBank Killer,

What you'll find inside these pages is nothing short of the Holy Grail.

We deliberated about selling this in an up sell on the back-end of ClickBank Affiliate Blueprints because this Resource Report is worth a fortune.

If you've sold nothing but ClickBank products, or you've never sold anything in your life this Report will prove to be the most important resource you possess.

Inside are located untapped reservoirs of the hottest prospects in every different niche in the ClickBank Marketplace. Point at where you want to dominate, and these secret tools, resources and services conquer that niche.

This isn't even close to anything you've ever read in a Report.

**You WON'T Learn Anything About:**

\*PPC (Pay-Per-Click)

\*SEO (Search Engine Optimization)

\*Copywriting (You Won't Have To)

\*Anything That Requires ANY Intelligence, Skill or Effort

Here's exactly what you do need.

## *Get Equipped*– Tools Required For Quick n' Easy ClickBank Profits

To make money consistently and reliably as an ClickBank Affiliate, you're going to need a few bare essentials for the job... **You need: (at bare minimum)**

- An autoresponder
- A domain
- A hosting account
- Testing & tracking software
- Something to sell
- And a market of rabid buyers

Here are my **highest recommendations** for each tool to get you up and running as quickly as possible...

[Autoresponder](#) – Use Aweber. They’ve got the highest deliverability in the game.

[HTML Editor](#) – I use Dreamweaver CS4 from Adobe. Though you’ll probably want to start with a free HTML “WYSIWYG” (What-You-See-Is-What-You-Get) editor like [Nvu](#). Easy breezy.

[A Domain](#) – Grab your domain from NameCheap. They’re the best. Never had an issue with them. Other domains will lock you out of your account for so much as a single complaint.

[A Hosting Account](#) – I personally use Host Gator and love them. I’m going to recommend you go with this popular marketing-friendly hosting company.

[Testing & Tracking Software](#) – Do yourself a huge favor and don’t buy testing & tracking software. Since Google released their WebSiteOptimizer, you’d be crazy not to use it. It’s free!

[Something to Sell](#) – Online marketers spend tons of time trying out different products, services, tools and websites. Not all of them are created equally and some simply aren't worth the time or effort.

ClickBank however provides you with an entire marketplace at your fingertips for making serious money in a very quick amount of time.

When you've had it with failed affiliate marketing programs, secrets and tools then it's time to pour your efforts into ClickBank. Affiliate marketing success is right around the corner if you know how to make the most of this service.

## How Does ClickBank Work?

[Click Here to Learn More About CB Affiliate Blueprints™](#)

ClickBank is a commission based affiliate marketing program that allows you to advertise and promote thousands of different products.

You create special links called *hoplinks* which include your affiliate ID and the advertiser's sales page. Then, when somebody clicks on your link and ends up making a sale, you get the commission for it.

Commissions for some products are 50% or even 75% and more! This leaves a huge potential for earning a great deal of money with ClickBank.

Additionally, there are no added costs to use the service.

Being an affiliate with ClickBank is absolutely free.

Making things even easier is that you don't need to join up with individual advertiser programs. You have access to all the different products and services.

In addition, there is no limit to the amount of products you choose to work with and promote. You may want to spend a lot of time really focusing on a narrow niche and only trying to sell a few popular products...

Conversely, you may be interested in trying to hit lots of different niches and industries, and to sell every product under the sun.

No matter what your promotional strategy is, you'll see there is a great deal of profit potential with this [affiliate marketing service](#).

## What Makes ClickBank Stand Out?

As mentioned, there are clearly many different benefits to the ClickBank system. You have immediate access to thousands of products and there's no limit to the amount you can promote. There are no costs for signing up with ClickBank and

you don't have to individually find and enroll in different programs.

Making things even better however is ClickBank's available data on the different products. You can quickly compare the commissions for different products, as well as other key pieces of data such as their average sale.

You'll be able to see how popular certain products are in terms of how many people are promoting with them. You can also find out the conversion rates for various products.

All of this makes your life as an affiliate marketer much easier, as you can quickly pick and choose between the most lucrative products.

ClickBank clearly has a lot of different strengths and benefits.

When it comes to affiliate marketing, it's at the top of the list for a reason.

There's no limit to the amount of money you can earn using ClickBank.

The only thing holding you back is you, so it's time to get started and dive right in.

The key to using ClickBank is that you have access to thousands of different products and companies that you can choose to promote.

This does several things for you.

First, you'll be able to find highly targeted products and services that are either closely aligned to websites you already run, or are in fields and topics with which you are very familiar.

Both will allow you to easily create effective content based around different products, helping you to sell more.

Additionally, with so many products at your fingertips you are able to pick the best ones. You can see all kinds of information for the various products and make comparisons about which of them really make the most sense to promote.

You can see how much commission a sale for a particular product offers, and you can also see the size of the average sale so you know how much you can actually expect to make.

You can also see factors such as how popular different products are.

Choosing a popular product is sometimes a very smart idea, because it sells well and people are interested in it.

However, the competition for the most popular products is also much more intense. Therefore it sometimes makes sense to choose less popular products that you know you can dominate the market for.

The way you end up making money with affiliate marketing through ClickBank is that using blogs, websites and articles you create content based around various products, services or niches.

You can review individual products and then lead people directly to click on a link with your affiliate ID to make a sale.

Or you can create more general content that features related advertisements for products based around the content you create or the topic you choose.

ClickBank operates on a commission structure, which means that you don't get money just for people clicking on your links, you make money when somebody clicks on your link and then actually buys something.

This raises your earnings potential and also adds to the importance of providing great pre-selling information, advice, guides and reviews that will help people make a quick purchase.

ClickBank has established itself as one of the industry leader for affiliate

marketing. If you've never dabbled in their services you have been missing out on a world of potential and possibility.

Begin your new affiliate marketing campaign using ClickBank and these killer resources and you'll be able to see amazing results almost immediately.

Now you're ready to learn the fastest and easiest way to make money online from any ClickBank product with a decent sales letter and pre-written promo tools...

## Newspaper And Magazine Advertising

Buying a single ad in a SINGLE newspaper or magazine is an EXPENSIVE way to advertise. What if you could buy "wholesale advertising" in multiple papers and pay a deeply discounted price for your advertising? Well you can.

I almost always go through an **ad broker**. 99% of the time the rates will be less than if you went to the source directly.

## How To Instantly Triple Your Exposure From Any Ad In USA Today

**Hot Tip!** Look for newspaper and magazine deals that hit your target market and that have some "shelf life". USA Today has a weekend edition that's on the newsstands for 3 days instead of just 1 day. Many other papers publish weekly instead of daily. So by sending your ad at the end of the week, you instantly get exposure for Friday, Saturday AND Sunday!

Look them over, then give it a go.

### Placing Ads in USA Today!

I almost always place at least 1 classified ad in USA Today when I launch a new Biz Op.

The ONLY time I don't do this is if I look in USA Today and see that 3 or more people are ALREADY marketing the same opportunity. If I create or have access to a UNIQUE marketing message THAT IS NOT being used in USA Today, even if there are several others promoting the same opportunity, I will place my ad.

**There are 5 BIG reasons I recommend advertising in USA Today.**

**REASON #1:** Advertising in USA Today gives you HUGE exposure. It's the #1 read newspaper in the USA, so it is seen by MILLIONS of people.

**REASON #2:** Another reason it's so great is that the USA Today Classified Ad Section is only included in the paper 2 times a week: Friday and Wednesday. This

means you don't have to spend tons of money to be in the paper day after day just to reach your target market.

There's also a BIG trick here you need to know. USA Today is ONLY printed Monday-Friday! This means that if you place your ad in the Friday paper, it'll be sold FOR 3 DAYS! Friday, Saturday, and Sunday! It's like getting 3 days for the price of 1 and the reason I HIGHLY recommend only placing ads for this timeframe.

**REASON #3:** Another HUGE benefit to advertising in USA Today's Classified Ads Section is that it's 90% Business Opportunities! This means that almost EVERYONE that reads the USA Today Classifieds is LOOKING SPECIFICALLY for a Biz Op!

I look to the USA Today Classified Section FIRST when I'm interested in seeing what other opportunities are being offered "out there". This is great market research... And trust me, MANY other EXTREMELY successful Biz Op marketers DO THIS TOO!

Because of this, advertising in USA Today GREATLY increases your chances of bringing VERY experienced marketers into your team.

**REASON #4:** USA Today's Classified Ad Section is ALSO seen ONLINE!

This means that your USA Today Classified ad is not only seen in the printed paper, but also on THEIR WEBSITE - [www.USAToday.com](http://www.USAToday.com), which gets LOTS MORE people seeing your ad!

PLUS, your ad will be seen in the Classified Ads Section of their website FOR SEVERAL WEEKS!

**REASON #5:** The last great reason to test some ads in USA Today is that once you find some ads that work well with it, you can take those ads and now TEST them in OTHER newspapers.

I recommend you TEST everything from large newspapers, like your city newspaper, AND small newspapers, like your local Penny-Saver or other free local papers. BUT DON'T LIMIT YOURSELF to your local papers! You'll want to expand your reach more and more over time, and to do this you need to go NATIONWIDE! This is the direction you want to be thinking!

A standard weekend ad in USA Today costs less than \$300 if you use these guys:  
<http://www.wolfenterprises.net/usatoday.html>

- Excellent resource for running a **4 line classified ad**.
- Use Friday edition ONLY for best response.
- Can be very competitive so be aware of who's running what.

The key to this type of offline advertising as with anything else is long-term **consistency**.

Also keep in mind that the more frequently you advertise with Wolfe Enterprises the better the price. They'll even design a display ad for you if you need them to.

I highly recommend their service.

The right classified or display ad can swarm your website with gobs of targeted traffic. But do your homework in advance. Go to a Barnes and Noble, Borders, etc... and locate the business opportunity section.

Pull the Biz Op magazines off the shelf and go through each of them.

Take note of the ads that ATTRACT you (instantly) as well as the ads that are appearing in multiple magazines. These are (more often than not) the same ads that are proven winners for the person running them.

Now you'll know who your biggest competition is, what they're saying in their ads, and the offers they're presenting to their prospects.

Use this knowledge to your (ethical) advantage!

One last thing to keep in mind when doing magazine advertising is that there's a lag time of usually at least one month from when you place your order until when your ads come out in the magazines. For this reason it's important to keep this in mind when coordinating your other advertising.

## **Wait – Did Someone Say More Traffic?** ***How About Total Traffic Domination?***

*“More coffee please?”*

These resources will have you going back for re-fills, but can also help you dominate the search engines for almost any keyword relatively easily, because these sites often get higher listings in Google than just about anything else...

But *these* traffic magnets tap into multiple traffic pools of their own.

**The result.** You get a *metric ton* of targeted traffic for any ClickBank Affiliate site.

The idea is to create a slightly different presentation/review/showcase of your product or web site on each of these free sites... then, link them all together, thereby establishing a total traffic network.

Spend some time going through each of these sites — sign up for them and get started placing REAL content relevant to the site you want to drive traffic to.

This works like gangbusters!

# For Great Response With Email Marketing, Test Your Solo Ad Campaigns To These Sources

The following sites are called List Builders or 3rd party mailers.

They're kind of like the safelists of old, except these convert MUCH better.

In fact, I now have three List Joe accounts. The reason is because every time I mail, I can expect a few hundred visitors and sales from each mailing!

The basic premise behind List Builders is that you sign up to be able to mail every other member within the list that you have credits for.

You get credits by clicking on links inside the emails you receive from other members of the mailer, and these credits translate into more members to whom you can send your offers.

Many of these mailers have a paid upgrade option which allows you to mail thousands of random members each and every week.

For example, with List Joe (my personal favorite) I can mail 3,000 random members every 72 hours, not counting my number of credits!

I can use up to 2,500 credits per mailing in addition to the 3,000 members and mail up to a staggering 5,500 random members every three days.

That is raw promotional POWER. It's like having an instant-list.

Every three days.

Now you see why I have three Gold accounts!

After more than \$80,000 in testing... these mailers bring the most sales.
